Career Objective

Motivated and adaptable individual seeking opportunities in any industry where I can apply my skills in technology, communication, and problem-solving. Open to both full-time and part-time positions. Eager to contribute to organizational success while gaining practical experience and professional growth.

Introduction

Dedicated Information Technology student with strong foundations in web development, database management, and data handling. Experienced in academic projects involving website development, statistical tools, and teamwork. Skilled in communication, problem-solving, and time management. Flexible and ready to take on roles across technical, administrative, or service-oriented fields.

Education

Our Lady of Fatima University – Bachelor of Science in Information Technology (2021 – Present)

Our Lady of Fatima University – STEM Strand (2019 – 2021)

Angono Private High School (2015 – 2019)

Experience

Web Development Projects (Academic Experience)

Our Lady of Fatima University | 2023 – Present

- Designed and developed **Kamitori Café** website as part of a marketing and IT integration project.
 - Built user-friendly interfaces using HTML, CSS, and JavaScript.
 - Integrated product display and order sections.
 - Collaborated with a team to align web design with brand goals.
 - Developed **Cozy Sneaks**, an e-commerce website for sneaker products.
 - Created login, signup, add-to-cart, and admin dashboard systems using PHP and MySQL.
 - Managed product pages, image galleries, and database connections.
 - Focused on responsive design and clean user navigation.
